

BACKHOE

The Blue Diamond® Backhoe attachment is a quick and easy way to dig trenches using a skid steer. This powerful unit uses the biggest cylinder in the industry and has the largest bucket capacity. The linkage geometry gives exceptional bucket rotation and breakout force. When the bucket is fully extended, the overall length is 8' and can dig a 6' depth. This powerful attachment will outperform other backhoes both in production and strength. The side pin cast teeth are replaceable, and bucket options range from 8" to 30" widths.

FEATURES INCLUDE

- Maximum digging depth is 6'
- 3 1/2" hydraulic cylinder bore and 20" stroke
- Pivot linkage between cylinder and bucket increases rotation and breakout
- Buckets available in 8", 9", 12", 18", 24", and 30" widths
- Replaceable side pin cast teeth
- Grease fittings on all pivot points
- Quick off and on machine
- Easy to operate and requires no electrical hookups
- Hose and flat faced couplers included

PART NUMBER	MODEL	WEIGHT
130005	Backhoe, Hyd (No Bucket)	388 lbs
