

# BRUSH CUTTER SEVERE DUTY MINI EXCAVATOR

Blue Diamond® Mini Excavator Severe Duty Brush Cutter is a serious attachment for clearing land! The Italian-made piston motor will tear through large brush with ease, boasting 40% more torque than geroler/gerotor type motors. The cut-away design allows better access to larger material and keeps grass standing while cutting, leaving a cleaner finish. The three AR400 blades make quick work of brush or grass. Proprietary valving allows this unit to be used without installing a case drain line, a first for a piston motor! This saves you time and money while giving the benefit of the piston motor's increased torque. Available only in 42" cut currently, it weighs 729 lbs. without a mount. Flow range is 16 to 26 GPM. 10,000 lbs. min machine weight recommended, for up to 19,000 lb. machines.

## FEATURES INCLUDE

- Bidirectional operation
- 1 year warranty
- 3 blades
- 1/4" thick deck for 50"
- 3/16" thick deck for 36" and 42"
- New greasable direct drive system

## APPLICATIONS:

- Mowing steep banks
- Mowing around ponds
- Cutting back brush on roadways and trails
- Reaching over fences and guardrails
