

SCREENING BUCKET

The Blue Diamond® Screening Bucket is used for the screening, aerating, separating and mixing of soils, aggregates, wood chip and compost. The efficient screening process is created by the star rotors agitating the material, causing the fines to flow through the rotating stars leaving the oversized material in the bucket. A hydraulic flow regulator is included to maintain correct RPM for poly stars.

FEATURES INCLUDE

- 1" or smaller material will flow through
- Horizontal shafts, fitted with poly stars that rotate in the same upwards direction
- Hardened steel cutting edge
- 2-position mount plate
- Hoses and couplers included
- Skid steer mount included

PART NUMBER	MODEL	WEIGHT
145010	47" Skid Steer	928 lbs
145015	60" Skid Steer	1,325 lbs
